## Dumbo

NuCli UFABC 2016

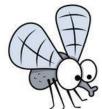

Lenin Cristi – Aerospace Engineering (a.k.a Rocket Science)

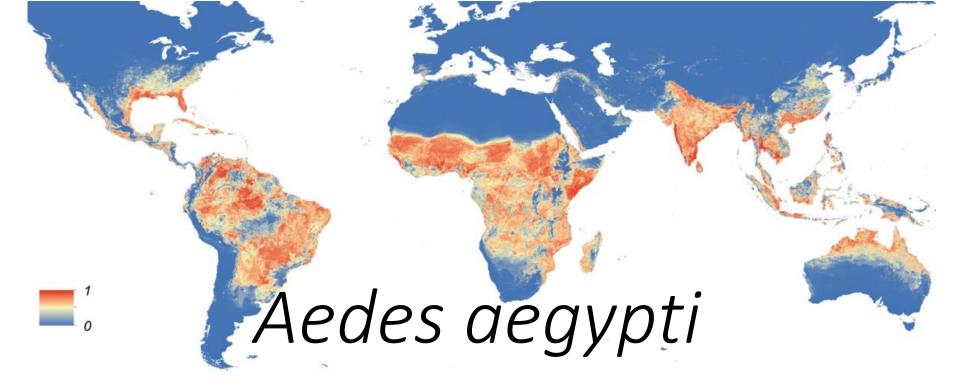

$$ec{F}=mec{a}$$

$$ec{F} = rac{\mathrm{d}ec{p}}{\mathrm{d}t} = rac{\mathrm{d}(mec{v})}{\mathrm{d}t}$$

(aēdēs from greek αηδής "hated" ægypti from latin "from Egypt")

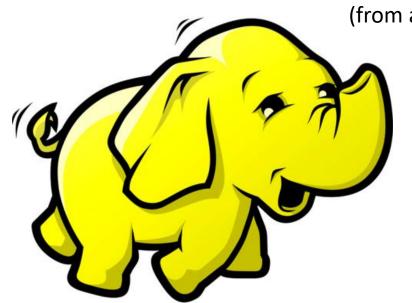

- Very hard to control
- •Rapid adaptation in urban environments
- •Eggs resist months until the arrival of water
- •The water on a bottle cap is sufficient
- Develops in dirty water

Global map of the predicted distribution of *Aedes* aegypti in 2015. The map depicts the probability of occurrence (from 0 blue to 1 red)

- •It's the "standard" BigData ecosystem
- Created by Doug Cutting and Mike Cafarella in 2005
- •Inspired by Google papers on MapReduce and Google File System
- •Capable to compute **massive** parallel jobs across thousands of nodes

## Hadoop

(from a toy of Doug's son)

Huge, immense, enormous, tremendous, large, big, whopping, gigantic, mammoth, gross, monumental, terrific, obscene amounts of data

•2003/October Google File System paper released

•2006/April Hadoop sorts 1.8TB on 188 nodes in 47.9h

•2007/April Yahoo runs 2 clusters of 1,000 machines

•2008/February Yahoo! production search index generated by a 10,000-core Hadoop cluster

(WR)Running on a 910-node cluster, Hadoop sorted one terabyte in 209s

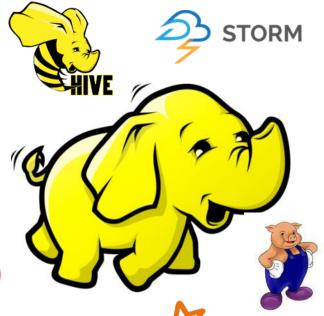

•2008/November Google MapReduce implementation sorted one terabyte in 68s

Only Facebook collects 15 terabytes of data per day. It's equivalent to 1.5 of the entire US Congress library.

Hadoop

(from a toy of Doug's son)

•2009/March

Yahoo runs 17 clusters with 24,000 machines

•2009/April

•2008/April

Hadoop sorts a petabyte

•2010/June

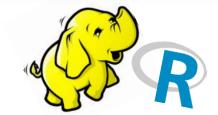

Yahoo 4,000 nodes/70 petabytes

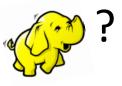

•2010/June

Facebook 2,300 clusters/40 petabytes

•2011/January

Facebook, LinkedIn, eBay and IBM collectively contribute 200,000 lines of code

? And...

L.A.I.

- •Based on the weather forecast plot focuses days in advance to the birth of mosquitoes
- •Increase the efficiency and effectiveness of combat strategies
- •Even predict the movement of the disease based on the reproductive cycle, rainfall and flying range
